## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statement (IDS) submitted on March 24, 2010 was filed after the mailing date of the application on October 22, 2003. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### *Response to Arguments*

2. Applicant's arguments, see p. 9-11, filed March 3, 2010, with respect to the rejections have been fully considered and are persuasive. The 35 U.S.C 112 rejection of Claims 1, 41, and 48 and the 35 U.S.C 103 rejections of Claims 1, 3-7, 29, 30, 32-34, 41, 44-48, and 50-56 have been withdrawn.

3. Applicant cites paragraph [0060] and Fig. 8 of Applicant's disclosure (p. 9), and argues that as shown from the foregoing, one of ordinary skill in the art would readily recognize express support for a switch configured to distribute lanes dynamically during operation including data transmission as claimed (p. 10).

In reply, the Examiner agrees. The 35 U.S.C. 112 rejection has been withdrawn. Paragraph [0060] of Applicant's disclosure describes "The PCI Express **switch 880 converts the sixteen lanes 871** coming from the chipset 220 root complex **into two or more distributed x16 links 872**, each connected to a x16 PCI Express Graphics slot. **When connected by the switch 880** to the chipset 220, a video card 870 may send **a very large burst of data** via the PCI Express connection 871 and the distributed x16 link 872. Because the video card 870 does not **continuously export data at the capacity** of the PCI Express connection 871, the use of the

Art Unit: 2628

**switch 880 better allows** the Multi-Video Card PCI Express Motherboard 800 to **exploit the large capacity** of the x16 connection to the chipset 220.” The Examiner agrees that from the foregoing, one of ordinary skill in the art would readily recognize express support for the switch distributing lanes dynamically during the transmission (sending, exporting) of the data in order to continuously export data at a large capacity by exploiting the large capacity of the x16 connection to the chipset.

4. Applicant argues that Levy (US 20040088469A1) fails to teach “wherein said switch is configured to distribute lanes dynamically during operation including data transmission” (p. 10).

In reply, the Examiner agrees. The 35 U.S.C. 103 rejections have been withdrawn.

#### ***Allowable Subject Matter***

5. Claims 1, 3-7, 29, 30, 32-34, 41, 44-48, and 50-56 are allowed.

6. The following is an examiner’s statement of reasons for allowance: The claims are allowed for reasons given in the Response to Arguments section above as well as Applicant’s remarks filed on March 3, 2010.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
